23. Contact
24. Complaints

1. Overview

As listed within the 'Health and Safety Within the Workplace Act (1974)' it is a requirement for all individuals to be informed of their rights to safety within the workplace. SHARE MAT is committed to complying with all current Health and Safety legislation. It has produced policies, procedures and guidance documents to meet the regulations set out by the Department of Education, The Health and Safety Executive, The Advisory Committee for Safety and Health at work (ACSH) and all other advisory boards and committees.

SHARE MAT employs a Premises & Compliance Manager to oversee Health and Safety and Risk across each of the academies within the trust. The Central Premises Team comprises the Premises & Compliance Manager and Premises & Compliance Officer. Contact details can be found in the 'contact us' section within this policy.

This policy applies to all those working in any of the academies within the Multi-Academy Trust including contractors and third-parties.

2. Legislation and Guidance

It is a requirement for all Schools and Public Authorities to adhere to the Health and Safety legislation set out to protect those working within the education sector.

The following is a list of legislation that SHARE MAT adheres to and has referenced within this document and in the production of Health & Safety toolkits, documents and templates:

- Health and Safety within the Workplace Act (1974)
- Regulatory Reform (Fire Safety) Order (2005)
- Control of Asbestos Regulations (2006)
- The GDPR Act (CCTV Regulations and guidance), (2018)
- First Aid at Work Regulations (1981)
- Electricity in Work Regulations (1989)
- Gas (Installation and Use) Regulations (1994)
- Control of Substances (Hazardous to Health) Regulations (2002)
- Independent Schools Standard Regulations (2010)
- Reporting of Injuries, Diseases and Dangerous Occurrence Regulations (2003), also known as 'RIDDOR'
- Management of Health and Safety at Work Regulations (1999)
- Department of Education, Health and Safety (advice on legal duties and powers), (2014)
- Manual Handling Operations Regulations (1992)
- Health and Safety (Display Screen Equipment) Regulations 1992
- Working at Height Regulations (2005)

SHARE MAT reserves the right to take guidance from additional legislation not outlined in the list above.

In addition to the forms of legislation listed above, this policy also complies with the trust's funding agreements and articles of association.

3. Statement of Intent

In accordance with the legislation published by the Health and Safety Executive, SHARE MAT is required to outline a statement of intent. The CEO, Trustees, Governors, employees and associates of SHARE MAT are committed to providing a Safe and Healthy environment for all users across the MAT.

The MAT's educational priorities are to:

- Encourage all pupils within the MAT to achieve their full academic, social and personal potential
- Provide pupils with all the necessary skills and experience, which will ensure that the widest possible range of choices become available to them in their future lives
- Provide a sense of community in which individuals feel safe, valued, and are actively encouraged to value, respect and help others
- Create an atmosphere and environment in which pupils enjoy and take pride in all of their achievements, no matter how large or small

All of the priorities outlined above are only achievable within a physical environment that is deemed safe and healthy. SHARE MAT recognises that in order to achieve this the co-operation and support of all of the staff within the trust is required.

Health and Safety within the MAT is an area that Trustees, Governors, the CEO, Headteachers, staff, associates, safety representatives and parents all share as a common objective. It is imperative that everyone within the MAT understands each other's duties, functions and responsibilities in relation to Health and Safety.

4. Our Health and Safety Aims

SHARE MAT's aims for Health and Safety are listed below (but not restricted to):

- Ensuring that all academies within the MAT are considered a safe place to work
- To provide the correct equipment and systems to all of those working across the MAT to minimise the risk to health and safety, as far as reasonably possible
- To raise awareness among everyone working across the MAT as to their roles and responsibilities for managing the health and safety of themselves and others
- To provide sufficient information, instructions, training and supervision to enable all employees to avoid hazards and contribute positively to their own, and others health and safety
- To ensure the dissemination of all relevant information and legislation from relevant bodies and organisations to the correct user/s
- To regularly monitor and review safety procedures throughout the academies within the MAT
- To create, review, manage and update a central repository of relevant health and safety documents, information, policies and templates

5. Responsibilities for Health and Safety

SHARE MAT follows the guidance provided by the Health and Safety Executive to determine the responsibilities and roles of those within the MAT.

HOLDERS OF RESPONSIBILITY:

The following are designated holders of responsibility for roles across the MAT:

Responsibility for the management of Health and Safety across SHARE MAT:
CEO of the Trust
Director of Operations
Premises & Compliance Manager
Premises & Compliance Officer
Headteacher - for each Academy

General Responsibilities:

General responsibilities are outlined as follows:

The Trustees of the MAT and Governors of each academy will:

- Ensure that sufficient funding is provided from the academy budget to enable the continued high level of health and safety practise
- Discuss and manage any health and safety related issues brought to them by the CEO, Headteachers, Staff, Parents or pupils
- Partake in regular meetings, and where appropriate emergency meetings, to discuss actions concerning health and safety
- Ensure that the Health and Safety Policy, and all associated policies, are brought to the attention of staff and implemented across all academies
- Confirm the status of compliance across the MAT with statutory policies and procedures
- Ensure that appropriate risk assessments have been undertaken
- Ensure that all staff members have received appropriate training and support
- Ensure adequate consultation takes place between managers and employees to allow everyone to contribute to a 'safe working environment'

The CEO of the MAT and Headteachers of the academy will:

- Ensure that health and safety is incorporated into the planning and organisation of all academy processes and functions
- Ensure sufficient communication takes place between managers and employees to allow everyone to contribute to a 'safe working environment'
- Ensure all staff members carry out correct Risk Assessments as appropriate to protect all those working across the trust
- Attend relevant health and safety training courses as and when appropriate
- Ensure that sufficient training and support is available to all members of staff
- Ensure that all staff members are aware of who their representatives are on all health and safety matters
- Ensure that staff members delegated to carry out health and safety tasks are fully competent and aware of their roles and responsibilities
- Investigate and oversee any accidents, incidents or near misses, as well as bringing all accidents, incidents and near misses to the attention of the Governors

All Staff, Contractors and Associates will:

- Ensure they are fully aware of their roles and responsibilities with reference to health and safety
- Co-operate and comply with the MAT's policies and procedures, as well as fully utilising and implementing guidance and documents provided to them by the MAT
- Attend health and safety training courses, awareness sessions and events provided to them
- Ensure that all safe working practises are adopted at all times
- Undertake appropriate risk assessments within their area of responsibility, document and escalate to the relevant people within the academy and MAT
- Alert all appropriate people of any accidents, incidents or near misses, dangerous equipment, defects, situations or concerns, that they may see or hear about across the MAT
- Work with the Central Premises Team to implement better practise further to accidents, incidents and near misses
- Report any issues that they feel they cannot manage themselves

6. Health and Safety Auditing

SHARE MAT is required by law to commission annual health and safety audits across all academies and the MAT. In addition to these external audits, SHARE MAT undertakes regular internal audits to ensure that it is aware of its current level of compliance, areas of concern and improvement strategies.

The external Health and Safety audits are carried out by **A J Gallagher & Co.**

SHARE MAT recognises the importance of consulting and cooperating with staff in the provision of a 'safe working environment' and 'safe working ethos'. The MAT has adopted the following terms of reference in relation to health and safety auditing:

- To examine internal and external health and safety reports and results
- Discuss areas of improvement and concern from audits
- Review health and safety arrangements, processes, procedures, policies, documents and templates on a regular basis, and implement new tools in association with appropriate legislation
- Keep up-to-date with current and new legislation, interpret and implement relevant actions across the MAT
- Monitor and review health and safety training, support and communication across the MAT
- Undertake termly site visits to assess each sites health and safety conditions
- Regularly review Risk Assessment documents, procedures and processes
- Monitor and review all accidents, incidents and near misses
- Implement best practise in response to all accidents, incidents and near misses

7. Training and Awareness

SHARE MAT aims to provide the best possible training and support to all staff working across the MAT. Where possible it will:

- Provide convenient training sessions to fit around staff's work schedules
- Provide 'drop-in' sessions during which staff may ask questions and discuss concerns regarding health and safety
- Provide external training for advanced and technical areas of health and safety
- Issue regular updates to SHARE MAT policies, guidelines and documents via the monthly newsletter
- Keep staff informed via posters, tools and documents, easily accessible at all times

Health & Safety training records will be maintained in a log with review dates to ensure that all health and safety training is kept up to date.

8. Risk Assessments

SHARE MAT is required by law to undertake risk assessments and investigations for any acts that are deemed to pose a risk to anyone within the MAT.

SHARE MAT has created a process for managing all risk assessments to track and monitor risk across all of the academies within the trust. The risk assessment process is outlined as follows:

- Curriculum lesson planning and schemes of work documentation will be used to record risk assessments, in addition to using templates provided

by the MAT and constructed using the Health and Safety Advice Portal (A J Gallagher & Co). All of SHARE MAT's risk assessment templates will be adapted to academy specific requirements.

- SHARE MAT will also undertake activity, person and specific risk assessments, and where appropriate, document Safe Systems of Working (SSOW) as and when required to do so.
- The MAT will ensure that risk assessments are easily accessible to all those who require them, as well as providing guidelines for use and advice for completing. All of SHARE MAT's risk assessments will be regularly reviewed by the Premises & Compliance Officer who will update them in line with current legislation.

All educational visits undertaken by the MAT will be subject to a written risk assessment process.

All risk assessments will be reviewed:

- At regular intervals.
- After accidents, incidents and near misses.
- After any significant changes to the workplace or premises.
- After any significant changes to the work practises or staffing arrangements.
- After any form of notice has been served.

9. Workplace Safety

The trust will take reasonable steps to ensure that all premises are safe for pupils, staff and visitors. This means keeping classrooms, corridors and communal areas tidy, organised and free of hazards. Appropriate clothing and good conduct will also be expected in school to contribute towards good health and safety practise.

Any hazards noticed by pupils, staff, contractors or visitors are to be reported to the school.

Display Screen Equipment (DSE)

The MAT recognises the importance of taking into consideration the health and safety surrounding the use of DSE and complies with 'Health and Safety (Display Screen Equipment) Regulations 1992'. Some of the potential health problems associated with incorrect use of DSE are:

- Upper Limb Disorders (ULD) (e.g. upper limb aches and pains caused by poor posture).
- Backache.
- Fatigue and stress.
- Temporary eye strain.

The MAT adopts the following precautions to ensure a safe system of work for any staff, pupils, volunteers and visitors across the Trust;

- Work areas are risk assessed and reviewed on a frequent basis.
- Individual DSE risk assessments are carried out by a competent person for staff who are identified or those who request it.
- Staff and pupils are trained on how to use Display Screen Equipment and this risks of working for a prolonged period of time.
- To report any issues or concerns to a line manager or the MAT's Premises and Compliance Officer.

Manual Handling

The MAT complies with 'Manual Handling Operations Regulations (1992)'. The MAT will provide information, guidance and training on safe manual handling for day to day tasks, and will, as is reasonably possible, avoid the need for staff to undertake manual handling operations at work which involve a risk of injury.

A suitable risk assessment will be carried out with staff to manage risk, implement control measures and ensure a safe system of work.

The MAT expects staff when manual handling within their role to:

- Safeguard their own health and safety whilst at work and those of any persons who may be affected by their actions.
- Follow safe systems of work as outlined within the risk assessment.
- Attend or complete training issued.
- Report all accidents, incidents and near misses to the MAT's Premises and Compliance Officer.
- Inform their line manager if they are unable to perform manual handling duties.
- Ensure they do not try to perform a manual handling operation which they believe is beyond their physical capability.

Slips and Trips

Slips and trips are the most common cause of injury at work and the most reported injury by members of the public. They can lead to both minor and major injuries and sometimes fatal accidents. Slips and trips occur in all educational premises. Accidents happen for a number of reasons, they typically involve:

- Members of staff or pupils moving around site quickly or running.
- Wearing unsuitable footwear.
- Uneven floor surfaces.
- Poor lighting leading to limited visibility.
- Spillages and wet floors.
- Obstructions (e.g. cables, bags, boxes).

The MAT aims to reduce the risk of slips and trips by:

- Ensuring suitable cleaning regimes are in place.
- Ensuring appropriate footwear is worn on school site by staff and pupils.
- Ensuring that all areas around site have suitable lighting.
- Ensuring that sufficient storage space is available.

Working at Height

The MAT complies with 'Working at Height Regulations (2005)'. The MAT will provide suitable information, guidance and training on safe working at height practise. The MAT takes a reasonable approach and understands that some activities will require working at height subject to the completion of a suitable risk assessment. Before working at height, staff are expected to do the following:

- Assess the risks.
- Ensure that the right equipment and PPE has been selected.
- Ensure that equipment has been suitably checked and serviced before use.
- Ensure that the space is safe and secure with no hazards or obstructions.

10. Fire and Health & Safety Management

SHARE MAT is required by law to carry out risk assessments for all its premises to ensure that they are safe in case of a breakout of fire. An outbreak of a fire in an academy can be extremely serious and dangerous. Under the 'Regulatory Reform (Fire Safety) Order (2005)', all academies are required to have an up to date fire risk assessment.

The Premises & Compliance Officer is responsible for carrying out risk assessments and ensuring that they are up to date. The Premises & Compliance Officer will work with the Premises & Compliance Manager, as well as the Administration Manager across each of the academies to ensure the delivery of up-to-date risk assessments. The Premises & Compliance Officer will ensure that any and all findings from the fire risk assessment are communicated quickly and effectively to the appropriate parties, as well as ensuring that any significant hazards have been addressed. The Premises & Compliance Officer will also ensure that there is a clear process in place for tracking and reviewing all risk assessments associated to fire.

SHARE MAT follows a strict fire drill process. A fire drill is undertaken once per term in each of the academies and within one month of new starters joining the MAT (this includes permanent staff and pupils).

The Administration Manager is responsible for ensuring that all fire drills are carried out within set guidelines, with support from the Central Premises Team, The Administration Manager will complete a 'Fire Drill Form' and track any issues from the drill and alert the relevant people.

SHARE MAT has a '**Fire Precautions Logbook**' in which it records all fire drills, fire alarm testing, emergency light maintenance and checks, fire extinguisher maintenance, fire officer visits and any appropriate issues that need recording. The Administration Manager within each of the academies is responsible for ensuring that the '**Fire Precautions Logbook**' is kept up to date. The Central Premises Team will check that the log book is kept up to date with unscheduled spot checks.

A copy of the '**Fire Precautions Logbook**' and a fire risk assessment will be accessible at all times and held within the SHARE MAT central office by the Facilities Team.

Displays, storage areas, escape routes, staircases and any other relevant areas must be fully flame retardant and will be checked regularly by the Central Premises Team.

Any hazardous and combustible materials will be monitored to ensure that they do not come into contact with sources of heat or any other source that may be deemed harmful. Risk assessments will be undertaken to ensure that all such materials are stored, managed and handled correctly. This will be managed by the department leads and overseen by the Central Premises Team.

The MAT will ensure that all internal fire doors (that are not fitted with automatic volumetric closing devices) are kept closed to stop fire spreading. Fire doors will be monitored and checked on a regular basis to ensure that the door, and the closing mechanisms are all operating correctly.

11. Permission to Work (Including Hot Working)

SHARE MAT is required by legislation to operate a 'Permission to Work' permit process, which also covers hot working conditions.

SHARE MAT's permission to work process must be carried out when any work will be conducted that it is deemed 'intrusive' to the structure of any of the buildings across the trust. The Central Premises Team will oversee the process to ensure it is carried out effectively. Any permissions to work processes will be recorded in SHARE MAT's '**Premises and Facilities Manual**'.

The Premises & Compliance Manager will ensure that the hot working process is carried out and implemented effectively in accordance with the 'Premises and Facilities Manual'.

12. Asbestos

SHARE MAT is required by law to have an effective and thorough process for managing and recording any known areas of asbestos. Asbestos is a naturally occurring mineral that has previously been used within the construction process of buildings and other products pre-2000's. Asbestos was used as a natural fire retardant and insulant, however was deemed hazardous post 2000.

SHARE MAT acknowledges and understands that asbestos is only deemed damaging to individuals if it is found to be disturbed or damaged. If asbestos is found in a good condition it poses no risk to individuals.

SHARE MAT takes the management of asbestos seriously across the trust and ensures that it maintains an accurate and up to date register of the whereabouts of all known asbestos areas across all sites. This is done in an '**Asbestos Register**' which is kept by the Premises Team (or FM provider for PFI schools) at all times.

Under the Control of Asbestos Regulations (2006), the Headteacher, as duty holder, is held responsible and accountable for the management of asbestos across the site. SHARE MAT operates a management of asbestos structure to delegate the internal management of asbestos throughout the school and trust.

The Central Premises Team will work with the relevant deputies within each of the academies to ensure that the asbestos register is kept up to date and accurate. They will also inform all relevant staff working in known asbestos areas or proposing to carry out work in these areas.

An asbestos survey and asbestos management reports are kept within the asbestos register and stored with the Premises Team (or FM provider for PFI schools) at all times unless stated otherwise. SHARE MAT's permission to work process will also be included to inform all relevant staff of any intrusive planned work to the structure of the buildings across the trust.

Where invasive building work is planned to be carried out a detailed asbestos survey will be carried out at the planning stages of any new work. No new work will be undergone until a full in-depth asbestos survey has been completed. This survey will cover the full scope of all of the work planned. The Central Premises Team will ensure that asbestos reporting is always considered at the planning stages of any invasive work considered across the trust.

SHARE MAT will ensure that a good relationship is maintained with all landlords and contractors. The Central Premises Team will liaise with landlords and contractors, when appropriate, to:

- Review the condition of asbestos materials
- Review and update any asbestos hazard risk assessments
- Record and update any floor plan changes

The Central Premises Team (or FM provider for PFI schools) is responsible for ensuring that any asbestos hazards are identified in appropriate reports and logged accordingly and for ensuring that all relevant persons are informed of such high-risk areas.

13. Legionella Risk Management

SHARE MAT recognises that Legionnaires disease is a type of pneumonia. This is an uncommon but incredibly serious disease. Legionnaires disease does not spread on a person to person basis, it is caught when small droplets of water are inhaled that contain the Legionella bacterium. Most people who inhale the bacteria do not become ill, however this is identified as a high-risk issue.

Outbreaks of Legionnaires disease occur when purpose-built water systems are at an optimum temperature to encourage the growth of the bacteria. This may put academies at risk where water is used for domestic purposes across the site.

A **Legionella survey** is carried out by the **Central Premises Team** and stored in the Central Services Offices.

SHARE MAT implements a **Legionella Maintenance Programme** to prevent the occurrence of bacteria growth in all of its academies. The Legionella Maintenance Programme can be found within the log book that also includes a **Legionella Survey Report**. Additional information on Legionnaires disease or the management process can be obtained by contacting the Premises Team.

The Central Premises Team are responsible for ensuring:

- That the recommendations from all reports are implemented
- That all appropriate personnel are sufficiently trained
- That all appropriate personnel understand what actions are required following a report and ensure that any relevant work required to improve legionella is completed
- That a competent person reviews the Legionella Survey Report every 12 months/or when any changes occur that may impact legionella
- That all activities in the Legionella Maintenance Programme are up to date and are delivered on time
- That all required documentation is kept up to date are stored correctly

14. Accidents, Incidents and Near Misses

SHARE MAT recognises that, even in a safety conscious academy, accidents may still occur. SHARE MAT outlines in this section how it handles all accidents, incidents and near misses across all of its academies.

The **Premises & Compliance Officer** will oversee that all accidents, incidents and near misses are effectively reported and recorded. Where accidents are required to be reported to the Health and Safety Executive, this will be done within the required legal time limit. If a Health and Safety consultant is required to support actions and decisions, a competent advisor will be brought in by the MAT.

SHARE MAT ensures that **all staff** are aware that they have a responsibility to report and record all accidents that occur in the academy in line with the MAT's policies and procedures. The Premises & Compliance Officer will ensure that they are aware of the requirements of completing a report and where to find the necessary documents and support. All staff will ensure that the accident book/log is kept up to date in each academy.

The Premises & Compliance Officer will review all accident reports to identify any common themes or patterns. They will refer any relevant reports to the senior management team to decide if an investigation should be taken further. All actions will be done in line with the MAT's policies.

In serious cases, the Premises & Compliance Officer will carry out an in-depth investigation to identify the cause of an accident and if better practise can be implemented. They will identify if any similar areas are at risk and use a Risk Assessment to prevent and mitigate the identified risk.

An investigation may be launched by external authorities in case of accidents, incidents or near misses that fall under 'Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (2013) (RIDDOR)'. Accident reports will be reviewed and witnesses may be interviewed. This may happen in cases including but not limited to:

- Deaths
- 'Specific injuries'
- Injuries that lead to incapacitation of staff for over 7 consecutive days.
- Non-fatal accidents for non-workers that result in them directly being taken to hospital.
- Occupational diseases.
- Dangerous occurrences and near misses.

15. First Aid

SHARE MAT is required by law to have a detailed and thorough first aid process in place across its site. SHARE MAT recognises that under the First Aid at Work Regulations (1981) it has a responsibility to provide sufficient and appropriate equipment and facilities across the trust. SHARE MAT also undertakes risk assessments across the trust to facilitate arrangements for first aid.

SHARE MAT publishes a list of qualified first aid trained staff across sites to make it visible and identifiable to all should this information be needed.

The Administration Manager on site at each academy keeps a record of qualifications as well as tracks renewal dates on all certificates. Records of training and renewal dates are also kept by the designated training company.

SHARE MAT operates a detailed risk assessment to evaluate the level of first aid required across all departments throughout the trust. Provisions for each department are accessible to ensure quick response to any potential injury.

16. Electricity

SHARE MAT is required by law to have sufficient policies and procedures in place to manage electricity across the trust. The MAT acknowledges that electricity has the potential to cause serious harm, and even in some incidents death, when not handled correctly. The Electricity at Work Regulations (1989) states that all electrical systems and appliances are frequently inspected and maintained to sufficient standards. SHARE MAT has a responsibility to maintain and repair any faulty electrical equipment on its premises.

Fixed installations (i.e. sockets, light fittings and general wiring throughout any of the premises) are tested at least every five years by a competent electrician. All testing is recorded and held by the Premises Team.

Portable electronic equipment will be inspected, tested and maintained in accordance with current HSE guidance and that of the Institute of Electrical Engineers. Further information is available in the Risk Advice Note (RAN12).

Personal electronic equipment may only be brought on site by staff once it has been approved by their senior manager. This will then be classed as academy equipment and may only be used once it has passed PAT testing.

The Premises & Compliance Manager (or FM provider for PFI schools) is responsible for arranging the testing and maintenance of portable electronic equipment in the academy, including all equipment brought in by staff.

All testing certification and documentation will be stored by the Premises Team (or FM provider for PFI schools). All fixed electrical testing and personal appliance testing (PAT) testing will be carried out by a suitable and competent person(s).

17. Gas

SHARE MAT is required by law to have sufficient policies and procedures in place to correctly manage gas across all of its sites. Under the Gas (Installation and Use) Regulation (1994), there is a requirement for all gas appliances (i.e. central heating boilers, gas water heaters) to be checked, serviced and maintained by a competent (Gas Safe Register, formally CORGI registered) contractor on an annual basis.

The Premises & Compliance Manager (or FM provider for PFI schools) is responsible for arranging the testing and maintenance of all gas appliances on site. Gas appliance inspections will be carried out by a suitable and competent person(s). All testing documentation will be retained by the Central Premises Team (or FM provider for PFI schools).

18. Substances

SHARE MAT is required by law to provide sufficient policies and procedures to demonstrate that it manages all forms of substances correctly within its academies. The MAT recognises that the Control of Substances Hazardous to Health Regulations (2002), COSHH, requires an assessment to be carried out on the work processes associated to the use of substances that are hazardous to health.

SHARE MAT holds an inventory on site at each of its academies for all hazardous substances held on site.

The Premises & Compliance Officer is responsible for ensuring that all appropriate personnel are suitably trained on how to manage hazardous substances. Where applicable, pupils that may need to use hazardous substances will be briefed on how to correctly use and manage them.

The heads of department are the authorised personnel to approve the purchase of hazardous substances.

19. Site Safety and Security

SHARE MAT is required by law to ensure that all of its sites are as secure and safe as possible. It takes the safety and security of staff, pupils and visitors seriously.

All issues related to damage, including suspected damage, should be reported to the Central Premises Team.

The Central Premises Team will ensure that regular site visits are conducted of the inside and outside of all the premises.

All sites are protected and monitored using CCTV. More information regarding the use of CCTV across the Trust can be found in the 'CCTV Policy'.

20. Safety Guidance Documents and Risk Advice Notes

Safety Guidance Documents (SG) and Risk Advice Notes (RAN) form part of the safe operating procedures and are used as appropriate to support the academies in the MAT in the practical day to day management of many aspects of academy safety. Copies of these documents are available to all staff and are available on the Staff Shared Area.

The Premises & Compliance Officer is responsible for ensuring that operational and strategic Health & Safety documentation is up to date and communicated to staff appropriately with the support of the Academy's Administration Manager. These documents, along with other general health and safety frameworks, toolkits and checklists are available to staff as an additional source of reference when carrying out a task (e.g. working with hazardous substances, planning an educational visit or setting up portable gas heaters in the event of a heating breakdown).

21. Contractors

The selection and management of contractors across the MAT is undertaken by the Central Premises Team. It is vital that any company or persons invited to work on a school site operates under the highest level of health and safety possible and is aware of our policy and procedures. When engaging a contractor, the following will be considered:

- All aspects of the work will be identified and set out in a job specification.
- Qualifications, experience and case studies.
- References (when required).
- Insurance and certification.
- Safety method statements.
- Risk assessments.

The trust will provide all contractors with relevant information about the site including asbestos management plans, fire evacuation information and emergency plans.

22. Pandemics and Infection Control

SHARE MAT understands that pandemics and infectious outbreaks are rare, however carefully planned, management systems and processes are in place to support academies in the event of such occurrences and to limit and lower the risk of infection on site.

The MAT monitors local, national and global situations in line with the UK Government, Public Health and World Health Organisations advice and guidance.

In the event of a pandemic or infectious outbreak, risk assessments, training and guidance will be supplied by the Central Services team and circulated to all academies to support and advise staff.

Further to the COVID 19 pandemic (2020), SHARE MAT has produced a pandemic and infectious outbreak management plan which will be implemented in the event of an outbreak on site. Advice and guidance will be sought from relevant professional bodies as appropriate.

23. Contact

Questions or concerns relating to this policy, or regarding health and safety across the trust should be directed in the first instance to the Central Premises Team.

Holly Senior

Premises & Compliance Officer, SHARE MAT
Holly.senior@sharemat.co.uk
01484 868777

Beverley Stapleton

Premises & Compliance Manager, SHARE MAT
Beverley.stapleton@sharemat.co.uk
01484 868777

24. Complaints

If it is felt that concerns and complaints raised regarding health and safety have not been dealt with effectively by the team at SHARE MAT, the next step is to raise a complaint to the supervisory authority.

The supervisory authority for health and safety is the Health and Safety Executive (HSE).

Health and Safety Executive

www.hse.gov.uk/contact
